# Get the Most of Your Microsoft Investments

CORE COMPETENCIES

C A P A B I L I T Y   S T A T E M E N T

Core Infrastructure

Our Microsoft-centric Core Infrastructure services include integration, customization and security solutions for Microsoft desktop PC platform optimization, Windows 7/8 and Office 2010/2013 productivity, Microsoft Forefront Security protection, Windows Server management, as well as time- and cost-saving efficiency in leveraging Microsoft Hyper-V technology and Microsoft System Center cloud platforms.

Microsoft Dynamic Solutions

TrueTandem consultants are helping clients nationwide across multiple industries leverage the power of Microsoft Dynamics, Dynamics CRM, Dynamics ERP and Dynamics xRM to automate business processes and maximize the value of relationships. Our team brings a deep expertise in Microsoft Dynamics as an enterprise development platform, as well as end-to-end experience integrating with SharePoint.

Business Productivity Infrastructure Optimization (BPIO)

From Microsoft Lync Server communications and SharePoint content management to messaging with Microsoft Exchange Server and Microsoft Project Server, TrueTandem can optimize your business productivity infrastructure to connect teams and improve access to information, saving you serious time and money.

Application Platform Optimization

From training and consultation to development and integration, TrueTandem can help you automate, optimize and maximize your investment in applications like Microsoft BizTalk, MS SQL Server and Visual Studio. When it comes to our Business Intelligence consulting practice, we work to help you get the most out of your organizational data. We also provide Software and Web Development services to drive and accelerate business impact.
